

Council Conflict Checker

Your CVMapper window should now show council properties along with a 500 foot buffer area (red hatching) surrounding each property.

- 1) Use the Search tools (Top left corner) to search for parcel(s) by address, owner, or APN. Alternatively, use the map navigation tools to zoom into your project area.
- 2) Check for potential conflicts. Conflicts exist when your parcel(s) or project overlaps with the red hatching.
- 3) Save your map to your desktop. Click the  button on the top right. This will open a separate window where you can add a title or notes to your map.
- 4) Drag and drop your map onto the Attachments tab on your item in Legistar. After it is uploaded, highlight the attachment to select it and uncheck the “Print this attachment...” and “Show this attachment...” boxes.
